

16 September 1963

MEMORANDUM FOR: Assistant for Administration, NPIC

ATTENTION : Training Branch

SUBJECT : Training Requirement

1. The Technical Intelligence Division has a number of persons in the Technical Services Branch assigned to evaluate the varied photographic input to the Center. These persons represent a variety of backgrounds of training and experience. The nature of their work requires a most thorough understanding of many facets of the field of photography. Much of this knowledge is not possible to attain in any available courses of instruction in the Washington area if available at all in courses open to the general public. Therefore TID has been considering what possibilities exist for acquiring this needed training.

2. One possibility appears to be the [redacted] which has a current contract with NPIC and has a cleared person, [redacted] assigned to NPIC much of the time. [redacted] has the talent to provide the training TID desires and if an arrangement could be made with [redacted] to provide this training, TID would like to do so.

3. [redacted] has talked with [redacted] regarding the possibility of inclusion of such training under the scope of the current contract with [redacted]. Upon the approval of [redacted] [redacted] have discussed in general terms with [redacted] whether such training might be provided [redacted] [redacted] said he would explore the idea and talk to us again in the near future.

4. TID would be most interested if an arrangement could be worked out with [redacted] to provide the needed training to a select group of TID personnel. There is also the possibility PSD may also be interested in such training.

[redacted]
